

AJ Power

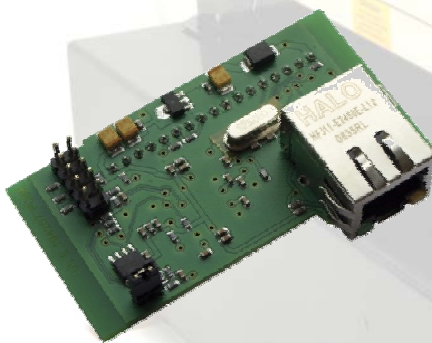

Remote communications options

AJ Power can offer remote communications options on gensets fitted with InSight 3200, 4000 or 6000 digital control systems. Remote communication can give many advantages including reducing the need for site visits, minimising downtime, prioritising maintenance and alarm notification.

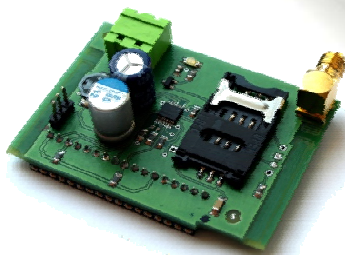

For the InSight 3200 controller platform, a GSM/GPRS* card or an Ethernet communication card can be connected directly to the controller, offering:

- Easy accessibility to multiple generators' data from any computer/smartphone with an internet connection.
- Full remote control of gensets, including starting and stopping, via LiteEdit software.
- The capability to receive immediate text messages or emails with data and alarm information.

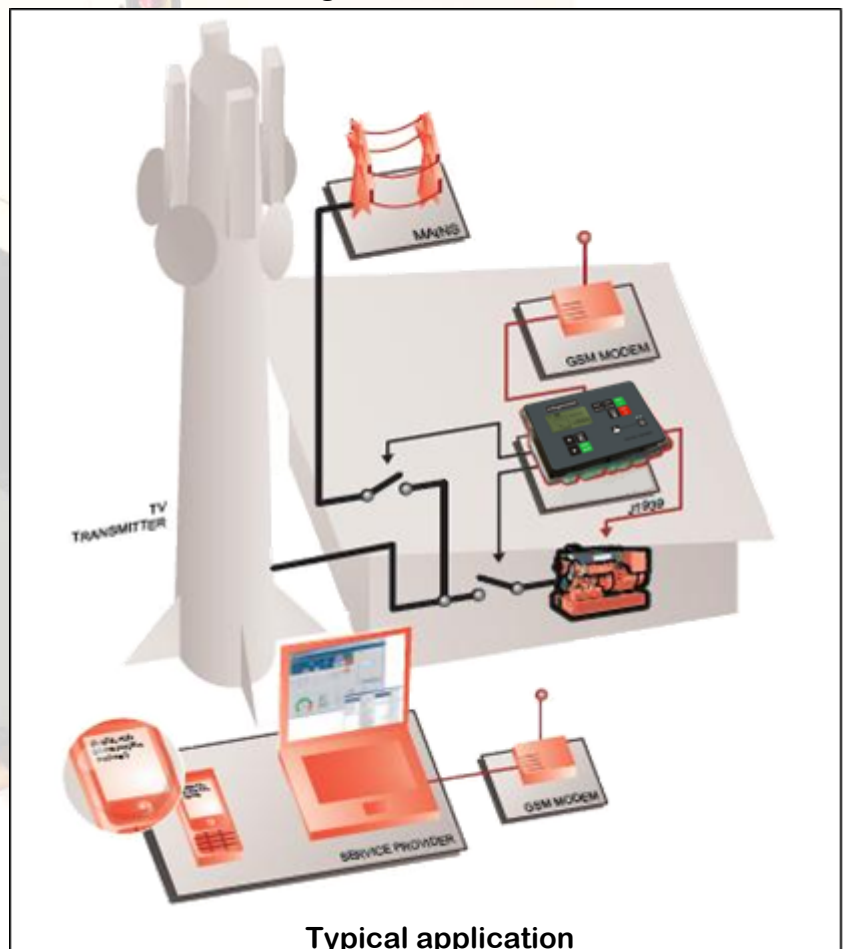

*sim card not included

IB-Lite Ethernet card

GSM-GPRS card

Typical application

AJ Power

For the InSight 4000 and InSight 6000 controller platforms used in advanced/higher specification projects, a netbiter module can be used as the gateway for remote communication. The netbiter offers the following features:

- Remote communication via GSM/GPRS, Ethernet LAN and internet.
- Easy accessibility to data
- Genset starting/stopping either with or without load run.
- Acknowledgement and clearing of active and past alarms
- Capability to receive immediate text messages or emails with data and alarm information.

For further details on AJ Power's remote communication options, please contact sales@ajpower.net
